OVERVIEW

Fullstack software engineer with strong interest in UI quality and design implementation. Experience building and shipping user-facing web applications using React, TypeScript, and modern frontend tooling in startup environments. Skilled at translating design concepts into production-ready interfaces and system workflows. Comfortable collaborating with product managers, designers, and engineers to deliver production software.

EXPERIENCE

Founding Engineer *Niheigo* Tokyo, Japan & US (remote) Aug 2021 - Present

- Founded and built a Japanese language learning platform serving 1,200+ monthly users
- Created modular product architecture and core learning workflows using documentation and storyboarding
- Developed interactive UI systems in React, TypeScript, and Redux including animated romaji-to-hiragana transitions, gamified typing practice, quizzes, and structured language exploration tools
- Designed systems allowing users to organize language content into structured groups, enabling reusable datasets for lessons and exercises
- Implemented secure authentication and session management using Node.js and JSON Web Tokens
- Integrated fine-tuned OpenAI GPT 4 model within backend API endpoint for structured sentence generation
- Developed backend services using Node.js and MongoDB, supporting application APIs and content storage
- Created internal datasets, tooling, and reusable pattern to support language content management and feature development
- Led product development from concept to deployment using interactive development, testing and continuous features releases

Full Stack Mentor *Open Classrooms* Paris, France & US (remote) Nov 2022 - Present

- Built and tested MERN applications to demo implementability and usability for student programmers
- Prototyped full-stack features in social media and e-commerce applications with Angular, Node, and PostgreSQL
- Translated system requirements to user stories and participated in collaborative code review using Git

LEADERSHIP

Bike Shop Manager *Dandyhorse SF* San Francisco, CA Jun 2024 - Jan 2025

- Managed daily shop operations, bike maintenance, client relations, and business development
- Improved booking and scheduling systems using FareHarbor, Airbnb, and integrated booking tools
- Standardized customer onboarding and equipment rental workflows

SKILLS

Frontend
JavaScript, TypeScript, React, Redux, Vue, HTML, CSS

UI / Design
Figma, D3.js, WebGL, responsive design

Backend & Data
Node.js, Express, Python, Django, PostgreSQL, MongoDB, Redis

Tools & Platforms
Git, AWS, Cloudflare, Heroku, BitBucket

EDUCATION

Bachelor of Science | Materials Science and Engineering Jun 2012 - Aug 2016
Pennsylvania State University, University Park | *School of Earth and Mineral Sciences*
